SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This notice is directed to the public in general. It may, however, be of particular interest to you if you manufacture (defined by statute to include import) and/or process TSCA-covered chemicals and you may be identified by the North American Industrial Classification System (NAICS) codes 325 and 32411. Because this notice is directed to the general public and other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be interested in this action.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through [regulations.gov](http://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- viii. Make sure to submit your comments by the comment period deadline identified.

II. Background

The Toxic Substances Control Act (TSCA) (15 U.S.C. 2601 *et seq.*) authorizes the EPA Administrator to promulgate regulations under TSCA section 4(a) requiring testing of chemicals and chemical groups in order to develop data relevant to determining the risks that such chemicals and chemical groups may present to health or the environment. Section 4(e) of TSCA established the ITC to recommend chemicals and chemical groups to the EPA Administrator for priority testing consideration. Section 4(e) of TSCA directs the ITC to revise the TSCA section 4(e) *Priority Testing List* at least every 6 months.

You may access additional information about the ITC at

I. Background

The ITC was established by TSCA section 4(e) “to make recommendations to the Administrator respecting the chemical substances and mixtures to which the Administrator should give priority consideration for the promulgation of rules for testing under section 4(a).... At least every six months ..., the Committee shall make such revisions to the *Priority Testing List* as it determines to be necessary and transmit them to the Administrator together with the Committee's reasons for the revisions” (Public Law 94-469, 90 Stat. 2003 *et seq.*, 15 U.S.C. 2601 *et seq.*). ITC reports are available from the ITC's website (<http://www.epa.gov/oppt/itc>) and from [regulations.gov](http://www.regulations.gov) (<http://www.regulations.gov>) after publication in the **Federal Register**. The ITC produces its revisions to the *Priority Testing List* with administrative and technical support from the ITC staff and ITC members. ITC members and staff are listed at the end of this report.

II. ITC's Activities during this Reporting Period (June to October 2012)

During this reporting period, the ITC discussed the 164 High Production Volume (HPV) Challenge Program orphan chemicals remaining on the TSCA section 4(e) *Priority Testing List*. As a result of these discussions, the ITC removed 16 HPV Challenge Program orphan chemicals from the TSCA section 4(e) *Priority Testing List*. Orphan chemicals are those HPV chemicals for which no sponsors have volunteered to develop and submit robust summaries of basic hazard and fate testing data to the EPA. The hazard and fate testing data requested by the ITC for HPV Challenge Program orphan chemicals are necessary to establish a screening level understanding of their potential human health and environmental impacts.

III. HPV Challenge Program Orphan Chemicals Removed from the TSCA Section 4(e) *Priority Testing List*

The Chemical Abstract Service (CAS) Registry numbers and names of the 16 HPV Challenge Program orphan chemicals being removed from the *Priority Testing List* are listed in Table 2 of this unit. Also listed in Table 2 of this unit are the ITC reports in which the HPV Challenge Program orphan chemicals were added to the *Priority Testing List* and the rationale for their removal. The Universal Resource Locators (URLs or website addresses) provide additional information about the disposition of these chemicals and are included as footnotes to Table 2 of this unit.

Fourteen of the HPV Challenge Program orphan chemicals that were removed from the *Priority Testing List* in this 71st ITC Report were added to the *Priority Testing List* in the 55th ITC Report (Ref. 1). Two of the HPV Challenge Program orphan chemicals that were removed from the *Priority Testing List* in this 71st ITC Report were added to the *Priority Testing List* in the 56th ITC Report (Ref. 2). Six of the HPV

Challenge Program orphan chemicals were removed because they were added to a Notice of Proposed Rulemaking (NPRM) that proposed to require manufacturers and processors of these chemicals to conduct testing for acute toxicity, repeated dose toxicity, developmental and reproductive toxicity, genetic toxicity, ecotoxicity, and environmental fate (Ref. 3). Three of the HPV Challenge Program orphan chemicals were removed because they were in the Organization for Economic Cooperation and Development (OECD) Screening Information Data Set (SIDS) program (<http://www.epa.gov/opptintr/chemtest/pubs/oecdsids.html>). The URLs for the three OECD SIDS chemicals are provided as footnotes b, e, and i to Table 2 of this unit. Six of the HPV Challenge Program orphan chemicals were removed because their testing was sponsored by the chemical's producers. The URLs for the six sponsored chemicals are provided as footnotes c, d, f, and g to Table 2 of this unit. One chemical was removed because it was an analog to a chemical with robust summaries and test plans. The URL for that chemical is provided as footnote h to Table 2 of this unit.
